

Dear Pharmacy,

As you may be aware, Cornwall Pharmacies will be working on Public Health Campaigns, local to the county, over the next 2 years.

This is part of the 'Cornwall Public Health Plus' project, funded by Public Health Cornwall and supported by Community Pharmacy Cornwall (formerly known as Cornwall & Isles of Scilly Local Pharmaceutical Committee (LPC)).

The first campaign will be around Sexual Health and this will be running across July and August.

Enclosed in this envelope are the following:

Posters

Signposting patients to speak to you, the Pharmacy team or to Brook (Cornwall's free sexual health and contraception services provider).

Please put these posters on display in your Pharmacy.

Data Collection Tally Chart

To record how many consultations or encounters you have with patients relating to Sexual Health, this includes all advice given by **any member of the Pharmacy team.**

QR Code

We are working with Public Health Cornwall to try and obtain data regarding awareness of Brook. Please can you ask patients to scan the QR code and complete the **anonymous** questionnaire.

(It could be done whilst they are waiting to speak to a member of the pharmacy team or after the conversation.)

At the end of August you can claim £250.00 via PharmOutcomes when you upload your data.

Any questions please contact admin@cornwallpc.org
